Chennai, 602302

SUMMARY

Fullstack Developer with experience building scalable microservices and REST APIs using Node.js, FastAPI, and modern frontend frameworks. Skilled in designing responsive web applications and deploying distributed systems using Docker and cloud platforms. Experienced in building high-impact, production-grade systems at scale.

EDUCATION

SRM Institute of Science and Technology Expected: May 2027
Bachelor of Technology in Computer Science (GPA: 8.2)

- Relevant Coursework: Software Engineering Principles, Cloud Computing (AWS), DSA in Python, LLMs, PostgreSQL
- Won 7+ **hackathons** hosted by Github, HackerRank, Tamil Nadu Fibrenet Corporation, and more

PROFESSIONAL EXPERIENCE

Fullstack Developer May 2025 – Jan 2026
State Election Commission, Kerala

- Led backend development of a recognized EVM management platform [[EVMTrack](#)] to digitize the election process.
- Designed RESTful APIs with structured request/response handling and performance optimization for 14 districts.
- Implemented caching strategies (Redis) and optimized database queries to improve response latency.
- Managed deployment using Nginx, docker, and Linux servers ensuring production reliability [MEITY Certified]

AI & LLM Engineer Aug 2025 – Mar 2026
Sentient Scripts [For Cyberproof UST], Thiruvananthapuram

- Developed web scraping pipelines using Beautiful Soup and Playwright to extract data from 20+ sources.
- Optimized an agentic RAG system to store and query insights from ~100 documents to reduce hallucinations.
- Utilized LLM LLaMA 3.2 70B locally via Ollama to analyze patterns and identify correlations across data sources.

Full-stack Developer Jan 2025 – Apr 2025
Faiscent Perfumery, Muscat

- Developed a full fledged e-commerce application [[Faiscent.app](#)] adhering to modern development standards.
- Designed RESTful APIs for catalog management of 350+ products, improving query efficiency and response times.
- Extensively used Postman for API testing and Swagger for API documentation.
- Built services using [Node.js](#), Express JS, MongoDB for API handling and database needs and git for versioning.

SELECTED PROJECTS & RESEARCH

[Pundit AI](#) [Patent applied, SRMIST]
Technologies: Python3, FastAPI, Groq Inference, HTML, Docker, Kubernetes

- Designed a text-generation pipeline for language models that enables long-form generation upto ~10,000 words.
- Utilizes knowledge graphs and recursive prompting to create an agentic chain that preserves content coherence.
- Received interest from HCLTech & TechMahindra associates at IRIS '24, an industry-academia collider.

[M Souq™ Oman](#)
Technologies: Python3, PostgreSQL, Redis, React JS, Azure

- Architected a high-performance e-commerce backend using FastAPI with pydantic and deployed RESTful services.
- Developed distributed task processing with Celery enabling background job execution for services like emails.
- Designed a Postgres DB with normalized schema, indexing, query optimizations and caching with Redis.

AWARDS AND RECOGNITIONS

2nd Place - Software at Hacknight '25

Hack Club, VIT Chennai campus

- Built a fullstack health analytics platform integrating ML with scalable backend APIs and a frontend dashboard.

2nd Place - Appathon '23

Dept. of Computational Intelligence, SRMIST

- Developed a fullstack fitness application with posture tracking, integrating visualizations with backend processing

1st Place - GitHub OSSOME [Healthcare]

GitHub Campus Program, SRMIST

- Improved Neurotone by adding secondary detection systems such as handwriting [CNN based] and tremor analysis.

Best Design & Innovation - HackerRank Campus Hackathon

HackerRank, SRMIST

- Created a browser based extension that utilizes a quantasized TensorFlow model to prevent phishing, dark patterns.

4th Place - Tamil Nadu Fibrenet Corporation Hackathon

TANFINET, Chennai

- Implemented a monitoring platform with data tracking and dashboards for visualizing network performance metrics.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, C

Frameworks and Tools: Node.js, Vue 3, Django, FastAPI, TensorFlow, PyTorch, Docker, PostgreSQL, AWS, MongoDB

Concepts: Microservices Architecture, RESTful APIs, CI/CD, Deep Learning, Agile Development, DBM

Languages: English, Hindi, Tamil, Malayalam

LEADERSHIP AND VOLUNTEERING

Ex-Design Head at a HarvardX recognized student NGO [F4F] that teaches students from rural India financial literacy.

Volunteered at the Founder's Club SRM to build the frontend for a custom mail client that the team uses.

Volunteered to build the frontend for [R/SYAC](#)'s [subreddit] website.

Mentored 10+ students, helping teams secure top positions in inter-college hackathons.
