

JESWIN SUNSI

SRMIST Kattankulathur | +91 6282869951 | jeswinsunsi@gmail.com | Jeswin Sunsi on LinkedIn

Versatile full-stack developer skilled in Python, Vue.js, and modern web technologies, with a strong interest in Artificial Intelligence and Machine Learning. Experienced in designing and building scalable, user-focused applications that blend intelligent data-driven features with clean front-end experiences. Programming since 3rd grade, starting with Q-BASIC. Currently enrolled in pre-final CSE at SRMIST.

SELECTED PROJECTS & RESEARCH

Pundit AI (Patent pending under SRMIST)

Designed & developed Pundit AI, an innovative content generation pipeline that employs a novel parallel algorithm to overcome the context limitations of large language models (LLMs). By intelligently orchestrating in parallel and using knowledge graphs, it enables the creation of coherent, long content up to 10,000 words.

EVM Management System for the State Election Commission, Kerala

Designed & implemented a secure digital management system for Electronic Voting Machines (EVMs). The system features role-based access control, end-to-end encryption, real-time device tracking, diagnostics, and reporting, ensuring streamlined operations, security, and maintainable, scalable architecture.

M Souq Online™ - Custom E2E Ecommerce Site

Worked on building M Souq Online, a custom e-commerce platform for a leading Omani smartphone and technology retailer, bridging traditional retail with digital commerce. The site employs usage of various fundamental web technologies to bring a visually aesthetic and lag-free experience to the end user.

Agnishield Protect (1st at Codecraftchase by SRM NWC Dept.)

Agnishield Protect makes use of NLP and machine learning algorithms to detect several anomalies and threats in websites real-time. It works in the browser as an extension, minimizing hardware usage and reducing intrusion, while keeping users protected from phishing, dark patterns, spyware, and more.

TOP AWARDS & ACHIEVEMENTS

1st Place at Datakon (DSBS, SRMIST)

Built Qwiksult, an accessible low-cost healthcare consultation platform at Datakon '23, a hackathon held by the Data Science & Business Studies Department at SRMIST, Chennai. [Team Lead & Frontend]

2nd Place in Software at Hack Night (VIT Chennai Campus)

Developed Neurotone, a voice-based Parkinson's detection toolkit using ML for the elderly at Hack Night, a national level hackathon hosted by Hack Club VIT, Chennai. [Team Lead & Full-stack]

1st Place at Mechathon (MEC, Oman)

Created NovoCode, an E-Commerce platform for SMEs and received 1st prize and a cash reward equivalent to USD 4000/- at Mechathon '22, a national hackathon held by the Middle East College. [Full-stack]

1st in Healthcare Track at GitHub OSSOME (GitHub Chapter, SRMIST)

Designed Jivalab, a comprehensive healthcare application, training several ML models in the process. The native app diagnoses several diseases including COPD, Pneumonia, Bronchitis etc. [Backend]

2nd in Appathon '23 (CINTEL, SRMIST)

Built a gym companion application that monitors exercise activities, provides real-time feedback on exercise form, and counts sets and repetitions. This innovative solution won first place at an official department hackathon. [Full-stack]

PROFESSIONAL EXPERIENCE

JUL 2025 – PRESENT

Full-stack Intern | Sentient Scripts (For Cyberproof UST) | Chennai, TN

Developed core modules for a comprehensive cybersecurity platform for UST Cyberproof. Collaborated within a cross-functional team to design and implement key components, leveraging web scraping, LLMs, and NumPy to enhance data processing and automation. Applied experience-based problem-solving to overcome complex technical challenges and improve overall system performance.

MAY 2025 – OCT 2025

Software Engineer | State Election Commission, Kerala | Thiruvananthapuram, KL

Developed an end-to-end solution for the State Election Commission, Kerala, to manage EVM components across the state. Engineered systems to handle complex, interlinked data flows and ensure reliability at scale. The final product serves 1,800+ election officials and manages over 400,000 components efficiently.

MAY 2023 – JUN 2024

Junior Developer | Bluelight Global LLC | Muscat, Oman

Developed a full-fledged E-Commerce platform using various core web technologies like Vue3, Mongo DB, & more. Gained insight into native development using Capacitor & the Ionic framework. Developed & integrated a coupon system for the platform, along with several internal tools used company wide.

EDUCATION

AUG 2023 – MAY 2027

B.Tech Computer Science & Engineering with Spec. in Software Engineering | SRMIST Kattankulathur

- Actively applying theoretical knowledge through projects and hackathons. Developing practical expertise in programming languages and frameworks, particularly Python, Vue.js, and Nuxt, while building full-stack applications and collaborative solutions

TECHNICAL SKILLS

- Python & Builtin Libraries
- FastAPI, Django, Flask
- Pytorch, HuggingFace, Numpy
- Node JS, Vue 3, Nuxt
- Axios, Tailwind, Vercel, Capacitor
- MySQL, PostgreSQL, MongoDB, ChromaDB

SOFT SKILLS

- **Adaptability:** Comfortable adapting to new challenges and environments.
- **Communication:** Clear verbal and written communication skills.
- **Quick Learner:** Rapidly understands new information and technologies.
- **Collaboration:** Experience working effectively in team settings during hackathons & projects.
